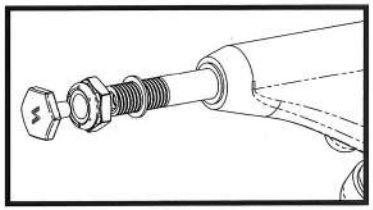
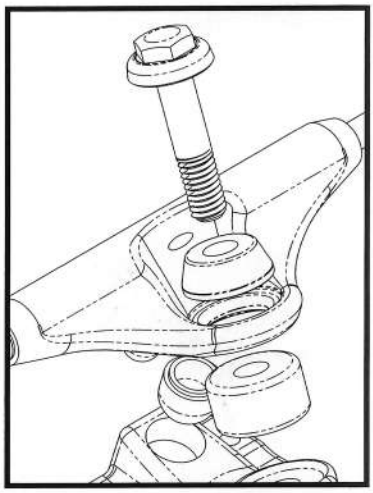
AXLE PROTECTORS

- a creative new design that protects the axle threads. These small metal protectors screw in to the ends of the axles and take the brunt of any force that is inflicted upon them allowing the truck axle to stay free of any damage or stripping.



SUPER LIGHTWEIGHT

- hanger 6.4oz baseplate 2.4oz
- a perfect combination of strength and stability, silver trucks are reinforced in areas that feel the most pressure, and trimmed of any excess weight in areas that don't need it.



INVERTED KINGPIN

- heavy duty low profile kingpin for smoother grinds.
- easily tighten or loosen your trucks with a standard skate tool without the risk of stripping or damaging the kingpin threads.
- inset baseplate bolt locking, no slip design.

ENGINEERING

- developed using 3d cad system aerospace technology.
- optimized by FEA - finite element analysis, a computerized stress analysis process that determines load bearing points and weight dispersion.

FLUENT TURNING

- the hanger and baseplate design grouped with silver bushings create a smooth, fluent turning response.

COLORS

- available in six colors

silver black navy red sky hazard
